General Travel Info Weather Climate in Botswana brings very hot, dry periods (September, October), and also very wet seasons (December February). Winter (June, July, and August) packs cold nights and mild, dry days, while November to February is hot and wet. Temperatures in summer soar as high as 40°C bringing warm nights and humidity levels fluctuating between 50% and 80%. The average annual rainfall is 450mm and most of it falls between December and March in the form of heavy afternoon thunderstorms. In contrast, the winter nights can drop to barely above freezing in the Delta and the desert, although daytime temperatures at this time of year are mild to warm.

Wildlife Botswana is a wildlife paradise, with elephants roaming in high numbers, hippos occupying every waterway, buffalo gathering en masse to drink from the waterholes, zebra migrations, red lechwe bounding through rivers, giraffe touching the tree tops, and warthogs shovelling the earth. Moremi and Savute are renowned for their abundance of predators. Lion, leopard, cheetah, wild

dog, and spotted and brown hyena, are some of the top predator species that are frequently seen hot on the heels of the herbivores.

The birdlife in Botswana is no exception to the fantastic collection of wild creatures that call this country home. The many waterways of the Okavango Delta and Moremi, and of course the Chobe river create a habitat for many water birds, while raptors soar overhead, and melodious larks disguise themselves in the scrub.
