

## Experience the Okavango Delta with Oddballs Camp

### ***Oddballs Camp and the Okavango Delta***

We will meet you at Maun Airport, introduce you to your pilot before you depart on an amazing 25min scenic flight to Oddballs' Camp deep in the Okavango. Oddballs' Camp is situated on the edge of Chief's Island, deep in the heart of the Okavango Delta, and is the Okavango Delta's most affordable camp. All activities are led by men from the local communities.

Oddballs' Camp is situated on the edge of Chief's Island, deep in the heart of the Okavango Delta. The area is known to be one of the most magnificent permanent water sites in the Delta. The camp is remote and offers a private safari experience with breath-taking views and sunsets. Oddballs' offers an extraordinary value-for-money experience in the Okavango Delta.

### ***Accommodation***

Accommodation is in 3m x 3m canvas rooms (including two family units), thoughtfully created and set on elevated wooden decks shaded by the trees and canvas shelters. Beautiful outdoor showers and ablutions en-suite offer hot and cold running water for a traditional al-fresco bucket shower. A small deck offers a place to relax and view the stunning scenery.

The bar and lounge areas at Oddballs' Camp provide a great meeting place and somewhere to swap stories around the fire. There is a raised viewing deck that overlooks the sweep of the Delta – the perfect vantage point from which to watch the sun set over the palms and view whatever wildlife may be visiting.

Oddballs' Camp offers no motorized activities. Each guide has his own mokoro (pl. mekoro), (the genuine wooden article, not the plastic replica), in which he'll take you gliding through the Okavango to nearby islands, where he'll walk you through magnificent scenery to view game, birds, insects, medicinal plants, tracks, signs, droppings, and other fascinating natural phenomena.

### ***Oddballs' Camp Game Viewing and Activities***

Oddballs' Camp is situated within a diverse habitat that includes an incredible variety of animals. Bird watching is excellent year-round, while the lagoons are home to bream, catfish and the feisty Tiger fish. Otters, honey-badgers, the shy pangolin, and a variety of the smaller wild cats such as civets, servals and genets are also seen on occasion in the Delta. Activities focus on offering guests a water-based experience and led by professional and knowledgeable guides who will accompany guests on all game activities. Activities are conducted by your own professional guide (a maximum of two guests per guide); a man who was born in the area and who lives in the local community.

Guests usually go out in the early morning, returning for a late breakfast, and venture out again in the afternoon after the midday heat has dissipated.

*Please be advised that the use of mekoro depends on several factors beyond the camp's control – water levels, vegetation growth, changes in the Okavango's channel-structure, and hippo activity, amongst others. These can and do change quickly and unpredictably. Consequently, Oddballs Camp may not be able to offer mokoro excursions due to practical constraints or safety considerations. If this is the case, they recommend guests participate in other activities that are equally enriching and complete a full-bodied safari experience.*

### **Children and Families**

Oddballs' loves them! They have two family units and no age restrictions. They believe that guests know their children and as they will not be doing any excursions in the company of other guests, they have only themselves to consider while on activities. Oddballs' is happy to accommodate alternative family dining times and to prepare simple food for children. They have games in the sitting area and reference books that will help to entertain and illuminate the children's experience.

## Considering the Wild

The power at Oddballs' Camp is generated by solar panels, and where possible the water is also heated this way. Oddballs' Camp also ensure that the large fuel tankers do not cross floodplains and streams or cut through forests to deliver diesel for their generators and pride themselves on being a camp without any engines or motors.

The local village, Sedibana, is 30-45 minutes from the camp. For over three decades Oddballs' Camp there has been a strong bond between the villagers and the camp. During this time, they have actively supported local development in the area. They assist in providing nursing care, veterinary assistance and transport to and from Maun for all the villagers.

Many of Oddballs' Camp's staff members come from Sedibana Village and have been with the company for at least 10 years, some more than two decades and there are also multiple generations of families who work at the camp. Oddballs' Camp generates revenue for the government and helps to police the resources against the depredations of those who don't care for it. Through their guiding and camp experience, they help create world-wide awareness and exposure of the resources within the Okavango Delta and beyond.
